*Statements in this Annual Report that reflect projections or expectations of future financial or economic performance of the Fund and of the market in general and statements of the Fund's plans and objectives for future operations are forward-looking statements. No assurance can be given that actual results or events will not differ materially from those projected, estimated, assumed or anticipated in any such forward-looking statements. Important factors that could result in such differences, in addition to the other factors noted with such forward-looking statements, include, without limitation, general economic conditions such as inflation, recession and interest rates. Past performance is not a guarantee of future results.*

*Investment in the Fund is subject to investment risks, including the possible loss of some or all of the principal amount invested. There can be no assurance that the Fund will be successful in meeting its investment objective. Generally, the Fund will be subject to the following additional risks: market risk, management style risk, sector focus risk, foreign securities risk, credit risk, interest rate risk, maturity risk, investment grade securities risk, junk bonds or lower-rated securities risk, derivative instruments risk, valuation risk for non-exchange traded options, risk from writing call options, real estate securities risk, MLP risk, Royalty Trust risk, risks related to other equity securities, and portfolio turnover risk. More information about these risks and other risks can be found in the Fund's prospectus and statement of additional information. When the Fund sells covered call options, the Fund gives up additional appreciation in the stock above the strike price since there is the obligation to sell the stock at the covered call option's strike price.*

*The performance information quoted in this Annual Report represents past performance, which is not a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. An investor may obtain performance data current to the most recent month-end by visiting [www.centaurmutualfunds.com](http://www.centaurmutualfunds.com).*

*The securities held by the Fund that are discussed in the Shareholder Letter were held during the period covered by this Annual Report. They do not comprise the entire investment portfolio of the Fund, may be sold at any time and may no longer be held by the Fund. For a complete list of securities held by the Fund as of October 31, 2017, please see the Schedule of Investments section of this report. The opinions of the Fund's advisor with respect to those securities may change at any time.*

***An investor should consider the investment objectives, risks, and charges and expenses of the Fund carefully before investing. The prospectus contains this and other information about the Fund. A copy of the prospectus is available at [www.centaurmutualfunds.com](http://www.centaurmutualfunds.com) or by calling Shareholder Services at (1-888-484-5766). The prospectus should be read carefully before investing.***

October 31, 2017 (Unaudited)

Dear Centaur Total Return Fund Investors:

The Fund produced a return of 16.73% for the twelve months ending October 31, 2017. Our primary benchmark, the Dow Jones U.S. Select Dividend Total Return Index, experienced a gain of 16.82% for the same period, while the S&P 500® Total Return Index returned 23.63%.

For the trailing 5-year period ending October 31, 2017, the Fund has produced an annualized return of 9.72% versus the primary benchmark's return of 14.47% annualized over the same period. The S&P 500® Total Return Index has returned 15.18% annualized for the five years.

For the trailing 10-year period ending October 31, 2017, the Fund has produced an annualized return of 8.18% versus the primary benchmark's return of 7.63% annualized over the same period. The S&P 500® Total Return Index has returned 7.51% annualized for the ten years. These comparisons, in addition to the inception-to-date comparative figures, are shown in the table below.

(For the Fund's most up-to-date performance information, please see our web site at [www.centaurmutualfunds.com](http://www.centaurmutualfunds.com).)

#### Performance as of October 31, 2017

Average Annual Total Returns	Past 1 Year	Past 5 Years	Past 10 Years	Since Inception*
Centaur Total Return Fund	16.73%	9.72%	8.18%	9.09%
S&P 500® Total Return Index	23.63%	15.18%	7.51%	8.57%
Dow Jones U.S. Select Dividend Total Return Index	16.82%	14.47%	7.63%	8.01%

*Performance shown is for the period ended October 31, 2017. The performance data quoted above represents past performance, which is not a guarantee of future results. Investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain more current performance data regarding the Fund, including performance data current to the Fund's most recent month-end, please visit [www.centaurmutualfunds.com](http://www.centaurmutualfunds.com). The performance data quoted above does not reflect the deduction of the redemption fee and if reflected, the redemption fee would reduce the performance quoted.*

*The S&P 500® Total Return Index is the Standard & Poor's composite index of 500 stocks a widely recognized index of common stock prices.*

*The Dow Jones U.S. Select Dividend Total Return Index is an index of 100 dividend-paying stocks selected according to a methodology developed and administered by Dow Jones & Co. It is not possible to invest in indices (like the S&P 500® Total Return Index and the Dow Jones U.S. Select Dividend Total Return Index) that are unmanaged and do not incur fees and charges.*

\* The Fund's inception date is March 16, 2005.

#### Total Annual Operating Expenses

	Net Expense Ratio**	Gross Expense Ratio***
Centaur Total Return Fund	2.06%	2.92%

\*\* *The net expense ratio reflects a contractual expense limitation that continues through February 28, 2018. Thereafter, the expense limitation may be changed or terminated at any time. Performance would have been lower without this expense limitation. The Net Expense Ratio above does not correlate to the ratio of total expenses provided in the Financial Highlights table of the Fund's Annual Report for the period ended October 31, 2017, as the Financial Highlights table does not include Acquired Fund Fees and Expenses.*

\*\*\* *Gross expense ratio is from the Fund's prospectus dated February 28, 2017.*

October 31, 2017 (Unaudited)

In previous letters we have provided a performance table for your consideration that shows calendar year performance rather than the more conventional mutual fund performance tables. Mutual fund performance is usually presented on a trailing basis (for example, 1 year, 3 years, 5 years, etc) as compared to a benchmark index, and this presentation for our Fund appears above. Below is a slightly different presentation of the Fund's performance by calendar year with comparisons to the S&P 500® Total Return Index (under the column "S&P500") and to our primary benchmark, the Dow Jones U.S. Select Dividend Total Return Index (under the column "DJ US DIV"). Please note that the figures for 2005 represent the performance from the Fund's launch date in March through year-end; the 2017 figures represent the performance for the first ten calendar months of 2017 through October 31st.

**CALENDAR YEAR RETURNS VERSUS BENCHMARKS 2005-2017**

<b>YEAR</b>	<b>TILDX</b>	<b>S&amp;P500</b>	<b>DJ US DIV</b>
2005*	9.24%	7.21%	5.38%
2006	15.75%	15.79%	19.54%
2007	-0.63%	5.49%	-5.16%
2008	-20.55%	-37.00%	-30.97%
2009	43.98%	26.46%	11.13%
2010	20.64%	15.06%	18.32%
2011	-2.33%	2.11%	12.42%
2012	17.94%	16.00%	10.84%
2013	16.78%	32.39%	29.06%
2014	7.20%	13.69%	15.36%
2015	-4.65%	1.38%	-1.64%
2016	11.34%	11.96%	21.98%
2017**	12.38%	16.91%	10.06%
<b>INCEPTION</b>	<b>200.16%</b>	<b>182.39%</b>	<b>164.53%</b>

\* 2005 return is from the Fund's launch on March 16, 2005 through December 31, 2005.

\*\* 2017 return is for the YTD period through October 31.

**Portfolio Update**

As of October 31, 2017, the Centaur Total Return Fund was approximately 41% invested in equities (common and preferred), bonds, and closed-end funds spread across 29 holdings. The Fund also owned options on various securities that comprised approximately 1.6% of Fund net assets, partially offset by covered call liabilities that comprised less than 1.50% of the Fund's net assets. Cash and money market funds represented approximately 59% of the Fund's net assets. The top ten investments represented approximately 29% of Fund net assets.

As of October 31, 2017 our top 10 positions were as follows:

<b>Position</b>	<b>% of Net Fund Assets</b>
Berkshire Hathaway, Inc., Class B	5.09%
Alphabet, Inc., Class C	4.35%
Interactive Brokers Group, Inc., Class A	3.68%
Brown & Brown, Inc.	3.10%
Alleghany Corp.	3.03%
Franklin Covey Co.	2.83%
Haw Par Corp., Ltd.	2.09%
USA Technologies, Inc.	1.73%
Boulder Growth and Income Fund, Inc.	1.65%
PDL Community Bancorp	1.46%
<b>TOTAL</b>	<b>29.01%</b>

*Please refer to the Schedule of Investments section of the Annual Report for a complete listing of the Fund holdings and the amount each represents of the portfolio. Holdings are subject to change without notice.*

**Annual 2017 Fund Update**

For the Fund's fiscal year running from October 31, 2016, to October 31, 2017, the Fund generated a return of +16.73%, which roughly matched (underperforming by a miniscule 9 basis points) the results from the fully invested primary benchmark, which returned +16.82%. The Fund's secondary benchmark, the fully invested S&P500 Total Return Index, returned a strong +23.63%.

While we would rather out-perform than under-perform, we are extremely pleased with the risk-adjusted performance of the Fund in the fiscal year just ended because these returns were produced with less than half the market exposure of the fully invested benchmarks. We estimate that the average cash position of the Fund during the year was somewhere north of 55% of total available capital. Adjusting for the look-through leverage of options employed by the Fund (both as expressions of long portfolio holdings and as market hedges) we estimate that the Fund's average net market exposure during the year was likely somewhere around 45%. This low market exposure implies that the Fund's return on capital employed during the year was quite high, likely above 40% on an annualized cash on cash basis (calculated from the 16.73% return on an average invested capital base of roughly 42% of the Fund that was not in cash) or slightly lower when compared to the estimated average market exposure of 45%. We believe this performance indicates strong stock selection in the year just ended.

So that is the glass half full. The glass half empty remains that the U.S. stock market continues to be very expensive and, in our view, continues to offer very unattractive long term prospective returns with above-average risk of capital impairment. This has limited our willingness and ability to deploy more of the Fund's capital. Unfortunately, our patience and discipline has been largely unrewarded over the past year, as markets continued to glide higher while exhibiting record low volatility levels. With market prices pushing ever higher, we find ourselves slowly and carefully moving the acceptability lines at the margins of our buy and sell discipline in our efforts to keep capital productively deployed, and have been willing to pay a bit higher prices for certain securities than we would have considered paying several years ago. We are doing our best to be both thoughtful and prudent about how much we are willing to compromise, and have generally done so only for the highest quality businesses or those we feel we are best equipped to analyze. In order to be consistent with the Fund's stated investment goals, we will make reasonable efforts to maintain the Fund's market exposure at no less than 40% of the Fund's net asset value.

**The Missing Bull Market Ingredient: Euphoria**

As of this writing in late 2017 median stock valuations in the United States are in the top 10% of valuation relative to history almost regardless of which metric one chooses to use for measurement, having reached heights that have only two prior instances: the late 1920's and the late 1990's, and investor experience in the decade following such instances have been uniformly dismal. The question one might reasonably ask is why nobody seems worried if stocks are clearly so expensive. And if nobody else seems worried, is there any reason for us to be so concerned?

There is an argument I've read in many different iterations over the past year or two that investors need not worry about market valuation levels until one sees clear signs of euphoria and speculation. The implication is that "you'll know it when you see it" and that before a market can break, there always has to be a tell-tale "blow-off" top. Those of us who were investing in the late 1990's easily remember the crazy speculative behavior and the popular manias surrounding internet, telecom, and biotech stocks.

It was also fairly commonplace at the time to read stories in the news featuring completely sane-looking people quitting respectable jobs so they could make more money day-trading tech stocks. More recently, many of us remember the media stories about the housing boom in 2005 and 2006 when speculators would show up on the opening day of a new housing development and buy five houses on credit in order to flip them later. We're generally not seeing that kind of obviously speculative behavior being reported in the financial media with regards to stocks today. In fact, nobody seems particularly euphoric about stocks, which is a little strange given the strong returns of the past few years. Most professional managers I talk to certainly seem cautious or at least concerned about valuations (even those that remain fully invested). Stock market sentiment amongst the general public is hard for me to gauge, but from where I sit it seems that the best description of the mood would be something close to ambivalence. The really cool people aren't talking about the stock market at all, because they are all too busy buying crypto-currencies and investing in early stage venture capital, or maybe selling put options on volatility ETFs.

Finally, there seems to be a notion gaining currency that bear market losses aren't really all that bad. For some reason that I don't completely understand, the financial media appears to have unofficially designated 20% as a standard definition of a bear market. To the extent that one doesn't think about this too deeply, it would seem that the penalty for being "long and wrong" by holding a portfolio of over-valued stocks is not terribly onerous. After all, 20% doesn't sound like much to lose in the "worst case."

**Bear Market Math**

First of all, let me say that I personally am not convinced that the lack of any overt signs of euphoria or wild speculative participation on the part of retail investors means that stocks cannot suffer either a material correction or a bear market given the current valuation levels. I view this particular bull market as being somewhat different in character than prior bull markets, driven as it has been by central bank accommodation and low interest rates. I also think that many active investors feel that they have been held hostage by a lack of options, and simply have no choice but to participate in the stock market even if they have reservations about high prices and low prospective returns. While trying to call the timing of precisely when a bear market or significant correction might strike is not likely to be tremendously productive, I do think it is prudent and helpful to be a student of economic and stock market history and to be aware of the possible ramifications of investing when prices are at historical extremes on either side of the valuation spectrum. My view is that the current market offers enough of the standard warning flags to make it more prone than average to either a significant correction or, if the right conditions were to align, a bear market. But this certainly doesn't mean it has to happen soon.

I emphatically disagree with the assertion that bear markets are easily ridden out, either financially or emotionally. First of all, a 20% decline in stock prices from current levels wouldn't constitute a bear market in my mind. I would consider that to be a much-needed correction, depending on how long it took for the market to recover the loss. What I have seen firsthand is that since I've been investing, real bear markets tend to follow what I call the 40/50/80 rule. What this means is that when a bear market comes, the best and safest investments in the asset class typically decline in price by 40% on average. The median or average investment falls by 50%. Then there's the most risky stuff, or the investments that are closest to the epicenter of whatever it was that drove the most speculative and risk-seeking behavior of the most recent bull market. That stuff usually loses 80% on average, with the flotsam going to zero.

I'll give you three examples of what I would call bear markets since I've been managing money. The first was the bear market of 2000-2002. The S&P500 fell about 40% over about two and a half years. The average stock or median stock was probably down 50% in that time. As for the stocks nearest the epicenter of the speculative excess, this would have to be the technology stocks (especially internet, telecom, and biotech) and the NASDAQ index subsequently dropped 83% from its peak. In the bear market from October 2007 to March

October 31, 2017 (Unaudited)

2009, the S&P500 actually dropped almost 50%. The median stock was easily down 50% or more. Anything leveraged or directly related to real estate or the credit markets got hit the hardest, but anything small and illiquid suffered badly too. As a group, this latter category probably fell closer to 80% on average, and a lot of vulnerable or risky stuff went to zero. The third example I'll give is the commodity bear market that began in late 2011 and lasted roughly to January 2016. Just to make the example easier, I'll use the precious metals market as a proxy. The highest quality securities in the precious metals mining sector probably fell 40-50% and the median stock was easily down 50% or worse. A prominent gold mining ETF, the GDX, fell by roughly 80% from late 2011 to early 2016, and a lot of junior mining stocks have gone to zero over the past several years. Now that is what happens in a bear market!

### Why Preparation Is Important

One of the reasons I'm writing this letter now is that I believe most investors systematically underestimate how they will be affected when a correction or a bear market comes. Stocks have been going mostly up for nine years now, and it feels like they will never – and maybe even can never – come back down. When thinking about it in the abstract (if they think about it at all) most people naturally believe that in times of stress that they will behave rationally, and that they won't be among those who panic and sell at the worst possible time. The reality, of course, is that most investors aren't so rational when the time comes, because when stocks are going down they feel like they might never go back up. And I can assure you that in a real correction or bear market, the percentage losses can be steep and harrowing, even if they don't exactly follow the 40/50/80 rule that I have described above. We also want to remind you now that the Fund's strategy is designed to be resilient and to handle stormy weather, and it has weathered corrections and even bear markets in the past and come out the other side reasonably well intact.

Also, I'd like to remind you that to some extent ours is a strategy that needs a certain amount of volatility and the occasional market correction in order to re-stock the portfolio with bargain securities in order to produce the returns we are seeking. The really great investing opportunities are almost always found in environments of fear and doubt, and it is critical to our strategy to have strong hands (and available cash) during such times. It's for this reason that we won't be lulled into complacency by the market's recent strength or the current low volatility levels.

In summary, while we'd like to have more capital productively deployed than we do today, we believe the Fund's current positioning is appropriate relative to the opportunities available. In the meantime, our search for value goes on, and if we see a great buying opportunity tomorrow we will act on it, regardless of what we think about stock prices generally. As always, we will do our best to ensure we are getting good value for money we have invested today, knowing that tomorrow might bring an entirely different and perhaps more attractive set of choices for us to consider.

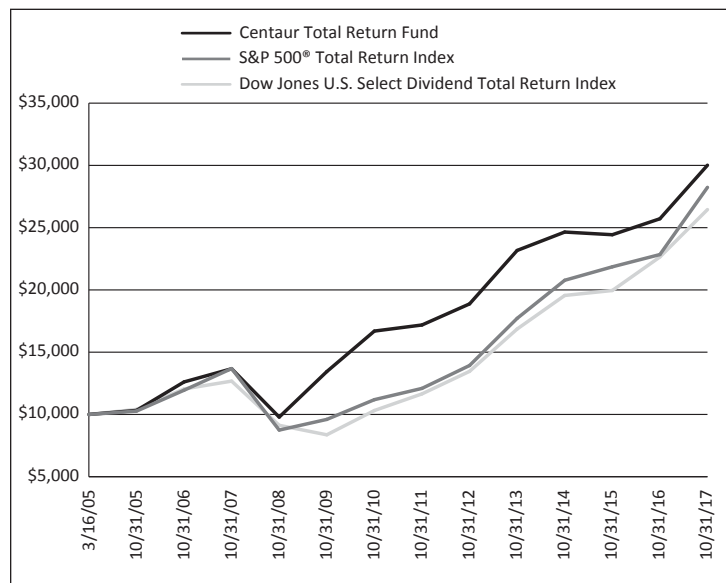

Respectfully submitted,

Zeke Ashton  
Portfolio Manager, Centaur Total Return Fund

**Growth of \$10,000 Investment (Unaudited)**

For the period from March 16, 2005 to October 31, 2017:

**Performance Returns for the period ended October 31, 2017**

Average Annual Total Returns	One Year	Five Year	Ten Year	Since Inception*	Gross Expense Ratio**
Centaur Total Return Fund	16.73%	9.72%	8.18%	9.09%	2.92%
S&P 500® Total Return Index	23.63%	15.18%	7.51%	8.57%	N/A
Dow Jones U.S. Select Dividend Total Return Index	16.82%	14.47%	7.63%	8.01%	N/A

Cumulative Total Investment Returns	Since Inception*	Final Value of \$10,000 Investment
Centaur Total Return Fund	200.16%	\$30,016
S&P 500® Total Return Index	182.39%	\$28,239
Dow Jones U.S. Select Dividend Total Return Index	164.53%	\$26,453

This graph assumes an initial \$10,000 investment at March 16, 2005, the inception date of the Centaur Total Return Fund (the “Fund”). All dividends and distributions are reinvested, if any. This graph depicts the performance of the Fund versus the S&P 500 Total Return Index and the Dow Jones U.S. Select Dividend Total Return Index. It is important to note the Fund is a professionally managed mutual fund while the indices are not available for investment and are unmanaged. The comparison is shown for illustrative purposes only.

\* The Fund’s inception date – March 16, 2005 (Date of Initial Public Investment).

\*\* The gross expense ratio shown is from the Fund’s prospectus dated February 28, 2017. This number may vary from the expense ratio shown elsewhere in this report because it is based on a different time period and does not include Acquired Fund Fees and expenses or expense waivers.

**Performance quoted above represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. An investor may obtain performance data, current to the most recent month-end, by visiting [www.centaurmutualfunds.com](http://www.centaurmutualfunds.com).**

The graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Average annual total returns are historical in nature and measure net investment income and capital gain or loss from portfolio investments assuming reinvestments of dividends, if any.

## 1. ORGANIZATION

The Centaur Total Return Fund (the “Fund”), is an active investment portfolio of the Centaur Mutual Funds Trust (the “Trust”), which is organized as a Delaware statutory trust and is registered under the Investment Company Act of 1940 (the “1940 Act”), as amended, as an open-ended management investment company. The Fund is classified as diversified as defined in the 1940 Act.

The Fund commenced operations on March 16, 2005. The investment objective of the Fund is to seek maximum total return through a combination of capital appreciation and current income. The Fund invests in equity securities of companies that Centaur Capital Partners, L.P. (the “Adviser”) believes are undervalued in the securities markets, but which also offer high dividend yields relative to the yield of the broad market averages.

## 2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Fund. The policies are in conformity with accounting principles generally accepted in the United States of America (“GAAP”). The Fund is considered an investment company for financial reporting purposes under GAAP.

### Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in the net assets from operations during the reported period. Actual results could differ from those estimates.

### Investment Valuation

The Fund’s investments in securities are carried at fair value. Securities listed on an exchange or quoted on a national market system are valued at the last sales price as of 4:00 p.m. Eastern Time. Securities traded in the NASDAQ over-the-counter market are generally valued at the NASDAQ Official Closing Price. Other securities traded in the over-the-counter market and listed securities for which no sale was reported on that date are valued at the most recent bid price. Securities and assets for which representative market quotations are not readily available or which cannot be accurately valued using the Fund’s normal pricing procedures are valued at fair value as determined in good faith under policies approved by the Trustees. Fair value pricing may be used, for example, in situations where (i) a portfolio security is so thinly traded that there have been no transactions for that security over an extended period of time; (ii) the exchange on which the portfolio security is principally traded closes early; or (iii) trading of the portfolio security is halted during the day and does not resume prior to the Fund’s net asset value calculation. A portfolio security’s “fair value” price may differ from the price next available for that portfolio security using the Fund’s normal pricing procedures.

### Option Valuation

Exchange-listed options are valued at their last quoted sales price as reported on their primary exchange as of 4:00 p.m. Eastern Time (the “Valuation Time”). For purposes of determining the primary exchange for each exchange-traded portfolio option the following shall apply: (i) if the option is traded on the Chicago Board Options Exchange (“CBOE”), the CBOE shall be considered the primary exchange for such option, unless the Adviser instructs Ultimus Fund Solutions, LLC (“Ultimus” or the “Administrator”) in writing to use a different exchange as the primary exchange for such option; and (ii) if the option does not trade on the CBOE, the Adviser shall instruct the Administrator in writing as to the primary exchange for such option. Unlisted options for which market quotations are readily available are valued at the last quoted sales price at the Valuation Time. If an option is not traded on the valuation date, the option shall be priced at the mean of the last quoted bid and ask prices as of the Valuation Time. An option may be valued using Fair Valuation when (i) the option does not trade on the valuation date; and (ii) reliable last quoted bid and ask prices as of the Valuation Time are not readily available.

**Fair Value Measurement**

GAAP establishes a framework for measuring fair value and expands disclosure about fair value measurements. Various inputs are used in determining the value of the Fund's investments. These inputs are summarized in the three broad levels listed below:

- Level 1 – Unadjusted quoted prices in active markets for identical investments and/or registered investment companies where the value per share is determined and published and is the basis for current transactions for identical assets or liabilities at the valuation date
- Level 2 – Other significant observable inputs (including, but not limited to, quoted prices for an identical security in an inactive market, quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 – Significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments based on the best information available)

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3.

An investment asset's or liability's level within the fair value hierarchy is based on the lowest level input, individually or in the aggregate, that is significant to fair value measurement.

The valuation techniques used by the Fund to measure fair value during the year ended October 31, 2017 maximized the use of observable inputs and minimized the use of unobservable inputs.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following is a summary of the inputs used in valuing the Fund's assets and liabilities as of October 31, 2017:

Investments in Securities at Fair Value	Level 1	Level 2	Level 3	Total
<b>Assets</b>				
Common Stocks	\$ 8,943,326	\$ —	\$ —	\$ 8,943,326
Preferred Stocks	405,920	—	—	405,920
Closed-End Funds	999,960	—	—	999,960
Closed-End Foreign Funds	123,107	—	—	123,107
Put Options Purchased	600	8,050	—	8,650
Call Options Purchased	296,475	190,105	—	486,580
Money Market Securities	15,035,286	—	—	15,035,286
<b>Total</b>	<b>\$ 25,804,674</b>	<b>\$ 198,155</b>	<b>\$ —</b>	<b>\$ 26,002,829</b>

**Other Financial Instruments**

<b>Liabilities</b>				
Written Call Options	\$ (56,250)	\$ (155,625)	\$ —	\$ (211,875)
<b>Total</b>	<b>\$ (56,250)</b>	<b>\$ (155,625)</b>	<b>\$ —</b>	<b>\$ (211,875)</b>

For the year ended October 31, 2017, there have been no significant changes to the Fund's fair value methodologies. The Fund did not hold any investments at any time during the reporting period in which significant unobservable inputs were used in determining fair value; therefore, no reconciliation of Level 3 securities is included for this reporting period. There were no transfers between any levels as of October 31, 2017 based on input levels assigned at October 31, 2016.

**Underlying Investment In Other Investment Companies**

The Fund currently seeks to achieve its investment objectives by investing a portion of its assets in Fidelity Investments Money Market Fund – Government Portfolio (the “Fidelity Fund”). The Fund may redeem its investment from the Fidelity Fund – at any time if the Adviser determines that it is in the best interest of the Fund and its shareholders to do so.

The performance of the Fund may be directly affected by the performance of the Fidelity Fund. The financial statements of the Fidelity Fund, a series of the Fidelity Funds, including the portfolio of investments, are included in the Fidelity Fund’s N-CSRS filing dated November 29, 2017, available at [www.sec.gov](http://www.sec.gov) or can be found at [www.fidelity.com](http://www.fidelity.com) and should be read in conjunction with the Fund’s financial statements. As of October 31, 2017, the percentage of net assets invested in the Fidelity Fund was 58.52%.

**Derivative Financial Instruments**

The following discloses the Fund’s use of derivative instruments:

The Fund’s investment objective not only permits the Fund to purchase investment securities, it also allows the Fund to enter into various types of derivative contracts, such as purchased and written options. In doing so, the Fund will employ strategies in differing combinations to permit it to increase, decrease, or change the level or types of exposure to market factors. Central to those strategies are features inherent to derivatives that make them more attractive for this purpose than equity or debt securities; they require little or no initial cash investment, they can focus exposure on only certain selected risk factors, and they may not require the ultimate receipt or delivery of the underlying security (or securities) to the contract. This may allow the Fund to pursue its objectives more quickly and efficiently than if it were to make direct purchases or sales of securities capable of affecting a similar response to market factors.

*Market Risk Factors:* In pursuit of the investment objectives, the Fund may seek to use derivatives to increase or decrease its exposure to the following market risk factors:

**Equity Risk:** Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

**Foreign Exchange Rate Risk:** Foreign exchange rate risk relates to the change in the U.S. dollar value of a security held that is denominated in a foreign currency. The value of a foreign currency denominated security will decrease as the dollar appreciates against the currency, while the value of the foreign currency denominated security will increase as the dollar depreciates against the currency.

**Risk of Investing in Derivatives**

The Fund’s use of derivatives can result in losses due to unanticipated changes in the market risk factors and the overall market.

Derivatives may have little or no initial cash investment relative to their market value exposure and therefore can produce significant gains or losses in excess of their cost. This use of embedded leverage allows the Fund to increase its market value exposure relative to its net assets and can substantially increase the volatility of the Fund’s performance.

Additional associated risks from investing in derivatives also exist and potentially could have significant effects on the valuation of the derivatives and the Fund. Typically, the associated risks are not the risks that the Fund is attempting to increase or decrease exposure to, per the investment objectives, but are the additional risks from investing in derivatives.

One example of these associated risks is liquidity risk, which is the risk that the Fund will not be able to sell the derivative in the open market in a timely manner, and counterparty credit risk, which is the risk that the counterparty will not fulfill its obligation to the Fund.

**Option Writing/Purchasing**

The Fund may write or purchase option contracts to adjust risk and return of its overall investment positions. When the Fund writes or purchases an option, an amount equal to the premium received or paid by the Fund is recorded as a liability or an asset and is subsequently adjusted to the current market value of the option written or purchased. Premiums received or paid from writing or purchasing options that expire unexercised are treated by the Fund on the expiration date as realized gains or losses. The difference between the premium and the amount paid or received on affecting a closing purchase or sale transaction, including brokerage commissions, is also treated as a realized gain or loss. If an option is exercised, the premium paid or received is added to or subtracted from the cost of the purchase or proceeds from the sale in determining whether the Fund has realized a gain or loss on investment transactions.

October 31, 2017

Statement of Assets and Liabilities – Fair Value of Derivative Instruments as of October 31, 2017:

Risk Exposure	Asset Derivatives	Fair Value	Liability Derivatives	Fair Value
	Statement of Assets and Liabilities Location		Statement of Assets and Liabilities Location	
Equity (Purchased Options Contracts)	Investments in securities, at fair value	\$ 495,230	N/A	N/A
Equity (Written Options Contracts)	N/A	N/A	Options written, at Value	\$ 211,875

The effect of derivative instruments on the Statement of Operations for the year ended October 31, 2017:

Risk Exposure	Statement of Operations Location	Realized Gain of Derivatives	Change in Unrealized Appreciation/ (Depreciation) on Derivatives
		Recognized in Income	Recognized in Income
Equity (Warrants)	Net realized gain on investment securities transactions and foreign currency transactions/Net change in unrealized appreciation (depreciation) of investment securities and foreign currency translations	\$ 166,341	\$ (133,987)
Equity (Purchased Options Contracts)	Net realized gain on investment securities transactions and foreign currency transactions/Net change in unrealized appreciation (depreciation) of investment securities and foreign currency translations	321,028	34,570
Equity (Written Options Contracts)	Net realized loss on written option transactions/Net change in unrealized depreciation of written option contracts	(48,728)	(51,190)

Average month-end contracts outstanding for the Fund during the year ended October 31, 2017 was as follows:

Derivative Type	Unit of Measurement	Monthly Average
Options	Contracts	(566)

**Balance Sheet Offsetting Information**

During the ordinary course of business, the Fund may enter into transactions subject to enforceable netting agreements or other similar arrangements ("netting agreements"). Generally, the right to offset in netting agreements allows a Fund to offset any exposure to a specific counterparty with any collateral received or delivered to that counterparty based on the terms of the agreement. Generally, a Fund manages its cash collateral and securities collateral on a counterparty basis. As of October 31, 2017, the Fund was not invested in any portfolio securities or derivatives that could be netted subject to netting arrangements.

**Foreign Currency Translation**

Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the exchange rate of such currencies against U.S. dollars on the date of valuation. Purchases and sales of securities and income items denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date. The Fund does not separately report the effect of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized and unrealized gain or loss from investments.

Realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes, and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in foreign exchange rates on foreign denominated assets and liabilities other than investments in securities held at the end of the reporting period.

**Investment Transactions and Investment Income**

Investment transactions are accounted for as of the date purchased or sold (trade date) for financial reporting purposes. Dividend income is recorded on the ex-dividend date. Certain dividends from foreign securities will be recorded as soon as the Fund is informed of the dividend if such information is obtained subsequent to the ex-dividend date. Interest income is recorded on the accrual basis and includes amortization of discounts and premiums. Gains and losses are determined on the identified cost basis, which is the same basis used for federal income tax purposes.

**Expenses**

The Fund bears expenses incurred specifically for the Fund and general Trust expenses.

**Dividend Distributions**

The Fund may declare and distribute dividends from net investment income (if any) monthly or at the end of each calendar quarter. Distributions from capital gains (if any) are generally declared and distributed annually. Dividends and distributions to shareholders are recorded on ex-date.

**Fees on Redemptions**

Prior to February 28, 2016, the Fund charged a redemption fee of 2.00% on redemptions of Fund's shares occurring within one year following the issuance of such shares. The redemption fee is not a fee to finance sales or sales promotion expenses, but is paid to the Fund to defray the costs of liquidating an investor and discouraging short-term trading of the Fund's shares. No redemption fee will be imposed on the redemption of shares representing dividends or capital gains distributions, or on amounts representing capital appreciation of shares.

**Warrants**

The Fund may invest in warrants. The Fund may purchase warrants issued by domestic and foreign companies to purchase newly created equity securities consisting of common and/or preferred stock. Warrants are derivatives that give the holder the right, but not the obligation to purchase equity issues of the company issuing the warrants, or a related company, at a fixed price either on a date certain or during a set period. The equity security underlying a warrant is authorized at the time the warrant is issued or is issued together with the warrant.

Investing in warrants can provide a greater potential for profit or loss than an equivalent investment in the underlying security, and, thus, can be a speculative investment. At the time of issue, the cost of a warrant is substantially less than the cost of the underlying security itself, and price movements in the underlying security are generally magnified in the price movements of the warrant. This leveraging effect enables the investor to gain exposure to the underlying security with a relatively low capital investment.

This leveraging increases an investor's risk; however, in the event of a decline in the value of the underlying security, a complete loss of the amount invested in the warrant may result. In addition, the price of a warrant tends to be more volatile than, and may not correlate exactly to, the price of the underlying security. If the market price of the underlying security is below the exercise price of the warrant on

its expiration date, the warrant will generally expire without value. The value of a warrant may decline because of a decline in the value of the underlying security, the passage of time, changes in interest rates or in the dividend or other policies of the company whose equity underlies the warrant or a change in the perception as to the future price of the underlying security, or any combination thereof. Warrants generally pay no dividends and confer no voting or other rights other than to purchase the underlying security.

### **Federal Income Taxes**

As of and during the year ended October 31, 2017, the Fund did not have a liability for any unrecognized tax benefits. The Fund files U.S. federal, state, and local tax returns as required. The Fund's tax returns are subject to examination by the relevant tax authorities until expiration of the applicable statute of limitations which is generally three years after the filing of the tax return. Tax returns for open years have incorporated no uncertain tax positions that require a provision for income taxes.

The Fund's policy is to continue to comply with the requirements of the Internal Revenue Code that are applicable to regulated investment companies and to distribute all its taxable income to its shareholders. The Fund also intends to distribute sufficient net investment income and net capital gains, if any, so that it will not be subject to excise tax on undistributed income and gains. Therefore, no federal income tax or excise tax provision is required.

## **3. TRANSACTIONS WITH AFFILIATES**

### **Adviser**

Centaur Capital Partners, L.P. is the Fund's investment adviser (the "Adviser"). The Fund pays the Adviser a monthly fee based upon the average daily net assets of the Fund and calculated at an annual rate of 1.50%. For the year ended October 31, 2017, the Adviser earned advisory fees of \$389,560.

The Adviser entered into a contractual agreement ("Expense Limit Agreement") with the Fund through February 28, 2018, to waive a portion of its advisory fee and to reimburse the Fund for other expenses to the extent necessary so that the total expenses incurred by the Fund (exclusive of interest, taxes, brokerage commissions, other expenditures which are capitalized in accordance with GAAP, other extraordinary expenses, dividend expense on securities sold short, "acquired fund fees and expenses" and 12b-1 fees) do not exceed 1.95% of the average daily net assets of the Fund. For the year ended October 31, 2017, the Adviser waived/reimbursed expenses in the amount of \$155,058.

### **Administrator**

Ultimus Fund Solutions, LLC (the "Administrator") provides administration, fund accounting, compliance and transfer agency services to the Fund. The Fund pays the Administrator fees in accordance with the Master Services Agreement for such services. In addition, the Fund pays out-of-pocket expenses including but not limited to postage, supplies and costs of pricing its portfolio securities.

### **Distributor**

Ultimus Fund Distributors, LLC (the "Distributor") serves as the Trust's Distributor. The Distributor acts an agent for the Trust and the distributor of its shares. The Distributor is compensated by the Adviser for its services provided to the Trust.

Certain officers of the Trust are also officers of the Adviser or the Administrator.

## **4. PURCHASES AND SALES OF INVESTMENT SECURITIES**

The aggregate cost of purchases and proceeds from sales of investment securities, excluding short-term securities, were \$13,615,883 and \$19,700,797, respectively, for the year ended October 31, 2017. There were no purchases or sales of U.S. government securities for the year ended October 31, 2017.

**5. FEDERAL INCOME TAXES**

Distributions are determined in accordance with Federal income tax regulations, which differ from GAAP, and, therefore, may differ significantly in amount or character from net investment income and realized gains for financial reporting purposes. Financial reporting records are adjusted for permanent book/tax differences to reflect tax character but are not adjusted for temporary differences.

Management has reviewed the Fund's tax positions to be taken on federal income tax returns for the open tax years of 2014, 2015 and 2016 and as of and during the year ended October 31, 2017, and has determined that the Fund does not have a liability for uncertain tax positions. The Fund recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense in the Statement of Operations. During the period, the Fund did not incur any interest or penalties.

Permanent differences in book and tax accounting were reclassified. Those reclassifications relate primarily to differing book/tax treatment of investment income and short term capital gains, foreign currency transactions, and other certain investments. For the fiscal year ended October 31, 2017, the following reclassifications, which had no impact on results of operations or net assets, were recorded to reflect tax character:

Paid in Capital	Accumulated Net Investment Loss	Accumulated Net Realized Gain on Investments
\$ —	\$ 241,156	\$ (241,156)

As of October 31, 2017, the aggregate cost of investments, gross unrealized appreciation and net unrealized depreciation for Federal tax purposes was as follows:

	Cost of Investments for Income Tax Purposes	Gross Unrealized Appreciation	Gross Unrealized Depreciation	Net Unrealized Appreciation
<b>Centaur Total Return Fund</b>	\$ 23,771,188	\$ 2,161,979	\$ (142,868)	\$ 2,019,111

Distributions paid during the fiscal years ended October 31, were characterized for tax purposes as follows:

	For the fiscal year ended	Ordinary Income	Long-Term Capital Gains
<b>Centaur Total Return Fund</b>	October 31, 2017	\$ 725,592	\$ 541,201
	October 31, 2016	960,176	527,789

As of October 31, 2017, the components of distributable earnings on a tax basis were as follows:

	Undistributed Ordinary Income	Undistributed Long Term Capital Gains	Accumulated Capital Losses	Net Unrealized Appreciation	Total Distributable Earnings
<b>Centaur Total Return Fund</b>	\$ 1,706,922	\$ 931,007	\$ (11,628)	\$ 2,019,111	\$ 4,645,412

The difference between book basis and tax basis net unrealized appreciation/(depreciation) is attributable to the mark to market of passive foreign investment companies, straddle loss deferrals, and the treatment of short-term capital gains as ordinary income.

As of October 31, 2017, the Fund had no accumulated capital loss carryforwards.

---

**6. COMMITMENTS AND CONTINGENCIES**

---

Under the Trust's organizational documents, its Officers and Trustees are indemnified against certain liabilities arising out of the performance of their duties to the Fund. In addition, in the normal course of business, the Trust entered into contracts with its service providers, on behalf of the Fund, and others that provide for general indemnifications. The Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund. The Fund expects the risk of loss to be remote.

---

**7. TRUSTEE COMPENSATION**

---

As of October 31, 2017 there were two Trustees, both of whom are not "interested persons" (as defined in the 1940 Act) of the Trust (the "Independent Trustees"). Each of the Independent Trustees receives a fee of \$2,000 each year plus \$500 per series of the Trust per meeting attended in person and \$200 per series of the Trust per meeting attended by telephone. The officers of the Trust will not receive compensation from the Trust for performing the duties of their offices. All Trustees and officers are reimbursed for any out-of-pocket expenses incurred in connection with attendance at meetings.

---

**8. SUBSEQUENT EVENTS**

---

Management of the Fund has evaluated the need for disclosure and/or adjustments resulting from subsequent events through the date these financial statements were issued. On December 8, 2017 the Fund paid a short-term capital gain of \$0.959697 per share, and a long-term capital gain of \$0.523502 per share to shareholders of record on December 7, 2017.

**To the Board of Trustees of Centaur Mutual Funds Trust  
and the Shareholders of Centaur Total Return Fund**

We have audited the accompanying statement of assets and liabilities of Centaur Total Return Fund, a series of shares of beneficial interest in Centaur Mutual Funds Trust (the "**Fund**"), including the schedule of investments, as of October 31, 2017, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the years in the two-year period then ended and the financial highlights for each of the years in the five-year period then ended. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of October 31, 2017 by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Centaur Total Return Fund as of October 31, 2017, and the results of its operations for the year then ended, the changes in its net assets for each of the years in the two-year period then ended and its financial highlights for each of the years in the five-year period then ended, in conformity with accounting principles generally accepted in the United States of America.

**BBD, LLP**

**Philadelphia, Pennsylvania  
December 28, 2017**

October 31, 2017 (Unaudited)

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including management fees and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period as indicated below.

**Actual Expenses** – The first line of the table below provides information about the actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

**Hypothetical Example for Comparison Purposes** – The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund’s actual expense ratio and an assumed annual rate of return of 5% before expenses, which is not the Fund’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds by comparing this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds. Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any direct costs, such as wire fees or low balance fees. Therefore, the second line of the table is useful in comparing ongoing costs and will not help you determine the relative total costs of owning different funds. In addition, if these direct costs were included, your costs would be higher.

	Beginning Account Value, May 1, 2017	Ending Account Value, October 31, 2017	Expense Ratio <sup>(a)</sup>	Expense Paid During Period <sup>(b)</sup>
Actual	\$ 1,000.00	\$ 1,085.30	1.95%	\$ 10.23
Hypothetical (5% return before expenses)	\$ 1,000.00	\$ 1,015.40	1.95%	\$ 9.88

<sup>(a)</sup> Annualized, based on the Fund’s most recent fiscal half year expenses.

<sup>(b)</sup> Expenses are equal to the Fund’s annualized expense ratio multiplied by the average account value over the period, multiplied by the number of days in the most recent fiscal half year (184), divided by 365.

---

## 1. PROXY VOTING POLICIES AND VOTING RECORD

A copy of the Trust's Proxy Voting and Disclosure Policy and the Adviser's Proxy Voting and Disclosure Policy are included as Appendix B to the Fund's Statement of Additional Information and are available, (1) without charge, upon request, by calling (1-888-484-5766) and (2) on the SEC's website at <http://www.sec.gov>. Information regarding how the Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 will be available (1) without charge, upon request, by calling the Fund at the number above and (2) on the SEC's website at <http://www.sec.gov>.

---

## 2. QUARTERLY PORTFOLIO HOLDINGS

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Fund's Forms N-Q are available on the SEC's website at <http://www.sec.gov>. You may review and make copies at the SEC's Public Reference Room in Washington, D.C. You may also obtain copies after paying a duplicating fee by writing the SEC's Public Reference Section, Washington, D.C. 20549-0102 or by electronic request to [publicinfo@sec.gov](mailto:publicinfo@sec.gov), or is available without charge, upon request, by calling the Fund at 1-888-484-5766. Information on the operation of the Public Reference Room may be obtained by calling the SEC at 1-800-SEC-0330, (1-800-732-0330).

---

## 3. TAX INFORMATION

The Centaur Total Return Fund designates 27.93% of the income dividends distributed between January 1, 2016 and December 31, 2016, as qualified dividend income (QDI) as defined in Section 1(h)(11) of the Internal Revenue Code.

Pursuant to Section 854(b)(2) of the Internal Revenue Code, the Centaur Total Return Fund designates 28.15% of the ordinary income dividends distributed between January 1, 2016 and December 31, 2016, as qualifying for the corporate dividends received deduction.

In early 2017, if applicable, shareholders of record should have received this information for the distributions paid to them by the Fund during the calendar year 2016 via Form 1099. The Fund will notify shareholders in early 2018 of amounts paid to them by the Fund, if any, during the calendar year 2017.

Pursuant to Section 852(b)(3) of the Internal Revenue Code, the Centaur Total Return Fund designated \$541,201 as long-term capital gain dividends.

---

## 4. APPROVAL OF ADVISORY AGREEMENT

On June 20, 2017, after considering the presentation by Centaur Capital Partners, L.P. ("Advisor"), the investment advisor to the Centaur Total Return Fund (the "Fund") and reviewing other information received by the Board of Trustees (the "Board" or the "Trustees"), and after consultation by the Independent Trustees with their independent counsel, the Board of Trustees, with the Independent Trustees voting separately, unanimously approved the renewal of the Investment Advisory Agreement between the Advisor and the Trust (the "Advisory Agreement") with respect to the Fund. In deciding whether to approve the Advisory Agreement, the Board recalled its discussions its review of the materials related to the Fund and Advisor throughout the preceding 12 months and its numerous discussions with management of the Trust and the Advisor about the operations and performance of the Fund during that period. The Board further considered those materials and discussions and other numerous factors, including the factors described below.

Throughout this process, the Independent Trustees were advised and supported by counsel.

- (i) *The nature, extent, and quality of the services provided by the Advisor.* In this regard, the Board reviewed the services being provided by the Advisor to the Fund including, without limitation, its investment advisory services since the Fund's inception, its coordination of services for the Fund among the Fund's service providers, its compliance procedures and practices, and its efforts to promote the Fund and assist in distribution of its shares. The Board also noted that the Trust's president, treasurer, principal executive officer, principal financial officer and chief compliance officer are employees or agents of the Advisor, and serve the Trust without additional compensation from the Fund. After reviewing the foregoing information and further

October 31, 2017 (Unaudited)

information in the Advisor Memorandum (e.g., descriptions of the Advisor's business and the Advisor's Form ADV), the Board concluded that the quality, extent, and nature of the services provided by the Advisor are satisfactory and adequate for the Fund.

- (ii) *The investment performance of the Fund and the Advisor.* In this regard, the Trustees compared the performance of the Fund with the performance of the Fund's benchmark indices, comparable funds managed by other advisors, a comparable private fund managed by the Advisor, and funds within the Morningstar categories comparable to the Fund. The Board noted that while the Fund had underperformed against its benchmark indices for the twelve months ended May 31, 2017 as well as underperformed against the average return for the funds in the Morningstar 50% - 70% Equity Allocation category under \$50 million for the twelve months ended March 31, 2017, the Advisor had explained the reasons for the Fund's underperformance and the Fund's historical performance was satisfactory. The Board also noted that the Advisor had reasonably demonstrated that it followed a reasoned and logical process for selecting investments for the Fund. The Board also considered the consistency of the Advisor's management of the Fund with the Fund's investment objective and policies. Following discussion of the short- and long-term investment performance of the Fund, the Advisor's experience in managing the Fund and the private fund, the Advisor's historical investment performance and other factors, the Board concluded that the investment performance of the Fund and the Advisor has been acceptable.
- (iii) *The costs of the services provided and profits realized by the Advisor from its relationship with the Fund.* In this regard, the Board considered the Advisor's staffing, personnel, and methods of operating; the Advisor's compliance policies and procedures; the financial condition of the Advisor and the level of commitment to the Fund by the Advisor and by the principals of the Advisor; the asset levels of the Fund; the overall expenses of the Fund, including the advisory fees; and the differences in fees and services provided to the Advisor's other clients that may be similar to the Fund. The Board considered its discussion with the Advisor regarding the Expense Limitation Agreement of the Fund, and considered the Advisor's current and past fee waivers and expense reimbursements with respect to the Fund. The Board further took into account that the Advisor has represented that it intends to continue the Expense Limitation Agreements for the Fund until at least February 28, 2019.

The Board also considered potential benefits to the Advisor in managing the Fund, including promotion of the Advisor's name and the ability of the Advisor to place small accounts that might otherwise be managed by the Advisor into the Fund. The Board compared the fees and expenses of the Fund (including the Fund's management fee) to the average and median advisory fees and expense ratios of funds in the Morningstar 50% - 70% Equity Allocation category under \$50 million and other funds within Morningstar categories comparable to the Fund. In considering the comparison of fees and expense ratios between the Fund and comparable funds, the Board looked at the differences in the types of funds being compared, the style of investment management, the size of comparable funds and the nature of the investment strategies. The Board noted that the management fee and net expense ratio of the Fund was higher than the average and median of the funds in the Morningstar 50% - 70% Equity Allocation category under \$50 million and other funds within Morningstar categories comparable to the Fund. The Board also compared the fees paid by the Fund to the fees paid by the private fund client of the Advisor, and considered the similarities and differences of services received by the private fund as compared to the services being provided to the Fund. The Board noted that the fee structure applicable to the Advisor's private fund was not indicative of any unreasonableness with respect to the advisory fees payable to the Fund. The Board considered the investment strategy and style used by the Advisor in managing the portfolio of the Fund. Following these comparisons and upon further consideration and discussion of the foregoing, the Board concluded that the management fee paid to the Advisor by the Fund is fair and reasonable in relation to the nature and quality of the services provided by the Advisor.

- (iv) *The extent to which economies of scale would be realized as the Fund grows and whether management fee levels reflect these economies of scale for the benefit of the Fund's investors.* In this regard, the Board considered that the fee arrangement of the Fund with the Advisor involves both a management fee and an Expense Limitation Agreement. In connection with the Fund, the Board determined that, while the management fee remained the same at all asset levels, the Fund has experienced benefits from its Expense Limitation Agreement and will continue to benefit from its Expense Limitation agreement until the Fund's assets grow to a level where its expenses otherwise fall below the expense limit. In addition, the Board noted that the Fund will benefit from economies of scale under its agreements with service providers other than the Advisor. Following

further discussion of the asset level of the Fund and expectations for growth and levels of fees, the Board determined that the Fund's fee arrangement with the Advisor continues to provide benefits through the Expense Limitation Agreement and that, at the Fund's current and projected asset level for the next year, the Fund's arrangement with the Advisor is fair and reasonable.

- (v) *The Advisor's practices regarding brokerage and portfolio transactions.* In this regard, the Board considered the Advisor's policies and procedures, and performance in utilizing those standards, to seek best execution for the Fund's portfolio transactions. The Board considered the historical and anticipated portfolio turnover rates for the Fund; the process by which evaluations are made of the overall reasonableness of commissions paid; the method and basis for selecting and evaluating the broker-dealers used; any anticipated allocation of portfolio business to persons affiliated with the Advisor; and the extent to which the Fund allocates portfolio business to broker-dealers who provide research, statistical or other services ("soft dollars"). After further review and discussion, the Board determined that the Advisor's practices regarding brokerage and portfolio transactions are satisfactory.
- (vi) *Possible conflicts of interest.* In evaluating the possibility for conflicts of interest, the Board considered such matters as the experience and abilities of the advisory personnel assigned to the Fund; the basis of decisions to buy or sell securities for the Fund and/or the Advisor's other accounts; the process for allocating trades amongst its clients; the method for bunching of portfolio securities transactions; and the substance and administration of the Advisor's code of ethics, specifically as it relates to possible conflicts of interest. Following further consideration and discussion, the Board found for the Fund that the Advisor's standards and practices relating to the identification and mitigation of potential conflicts of interests to be satisfactory.

Following its consideration of all of the foregoing, the Board unanimously approved the renewal of the Advisory Agreement. It was noted that in the Trustees' deliberation regarding the approval of the continuance of the Advisory Agreement, the Trustees did not identify any particular information or factor that was all-important or controlling, and that each individual Trustee may have attributed different weights to the various factors noted above.
